ARCHIAS' SERVICE is More Than Shipping Your Order Correctly

Behind the apparent service in filling orders carefully and correctly are a lot of other factors which make Archias' Service valuable to you.

Many years of practical experience in selecting and testing the strains of seeds, in learning the sources of supply of the purest and most prolific types are reflected in the seeds we offer to you.

A great many people do not realize the difference in the actual value of seeds FOR SEED PURPOSES which really exists. It does, however, mean much to you in growing a crop, whether it be corn or potatoes or

sweet peas or whatever your order may consist of, to know that the seeds you plant are the best that you can obtain.

Another thing of importance to you is that we make a practice of offering to you only the best varieties of the many on the market. Those varieties we offer are tried and proven and are without doubt more likely to succeed than other kinds which may be offered.

Our interest in your success is not ended when your order is filled correctly but we have been interested in it for years, and will be interested in the crops you obtain from our seeds this year.

We have taken every precaution to see that the seeds you purchase this year will make successful crops as far as it is within our power, because we realize that your future orders depend to a large extent upon the care we have taken in selecting your seeds.

Archias' Seed Store wants your business this year and your good will for future business and we feel that our efforts will assist you in raising better crops and give you a feeling of good will toward Archias'.

BAYER DUST

DRY TREATMENT FOR SEED CORN

Is just the same as Upsulun, made by the same people, only it is a dust treatment instead of a liquid treatment. The seed treatment with Bayer Dust is really simpler than the liquid treatment, and the same results can be had. It is necessary only to mix Bayer Dust thoroughly with the seed using 2 to 3 ounces to each bushel. A simple machine can be easily made on the farm. Take a barrel, or better, a tight, solid built box with a gas pipe running through it as an axle, set this up on some uprights and you are all ready to go to work. Both ends of the barrel or box should be closed and an opening for the insertion of seed and dust be cut in the side, fitted with a cover that can be fastened tight. Larger yields can be had from smaller fields if you treat your seed corn to control diseases. We are offering Bayer Dust this year in one-pound tins at \$1.25 per pound, f. o. b. Sedalia, Mo. Must go by express.

Glass Cloth

In many ways superior to glass for hotbeds, cold frames, chicken houses, scratch sheds, for covering window openings and for making a screen porch into a sun parlor.

It is much cheaper than glass. Lighter to handle. Does not break. Is almost as transparent as glass. Does not burn the plants in a hotbed and lets through more of the beneficial ultra-violet rays than does glass.

The cloth is a medium weight white muslin treated with a special preparation which makes it water-proof, translucent, weather-proof and long lived. It comes in one width only, 36 inches or a trifle less, and in standard size bolt of 15 yards. Can also be had in 6-yard and 10-yard bolts. Try to order these regular sizes if possible.

Special Prices—Glass Cloth

15-yard bolt (135 sq. feet) postpaid\$5.00
10-yard bolt (90 sq. feet) postpaid 3.50
6-yard bolt (64 feet) postpaid 2.25

This figures out less than 4c per square foot in full bolts, or one-fourth to one-eighth the cost of glass.

Archias' Self-Watering Flower Box

Each box is made 8 1/4 inches wide, 6 1/2 inches deep.

If You Have Not Had Successful Fruit Crops—Try Spraying

Trees cannot thrive when infested with sucking, biting and chewing insects. They cannot produce high grade fruit—nor much of any kind. Systematic spraying will not only increase the quantity of your fruit crop, but will wonderfully improve the quality as well. Thousands of fruit growers owe their present success to a good spray pump—after they had practically given up the hope of ever getting a good crop again.

Delicious Table Grapes

Grapes should be grown more widely both as a commercial crop and on the home grounds. There is no crop that commands a higher average money return and certainly none that will find a readier market either locally or for shipment.

Grapes are one of the easiest fruits to grow around the home. Train them to a fence or an arbor or even against buildings. They occupy little or no usable space and offer attractive foliage and shade as well as the most delicious fruit.

Mastodon Everbearing Strawberries

A REAL WONDER

Mastodon is a scientific cross between several of the best producers. This new everbearer has proven itself to be all that has been claimed for it. You have read some apparently extravagant stories about it. The results you will get from it will prove they are true. Mastodon will produce three large crops within 18 months after planting and big fine berries, too. Try a patch this year—you will be pleasantly surprised. 25 plants, \$1.00; 50 for \$1.75; 100 for \$3.00; 500 for \$12.00, postpaid.

Standard Strawberries

A FEW OF THE BEST ONES

Those marked (P) are pistillate varieties. They are the most productive, but a row of (S), a staminate or perfectly formed sort, should be planted every 10 or 12 feet to pollinize the flowers.

CLYDE (S). Large and showy; early.

CRESCENT (P). Early; bears profusely.

EXCELSIOR (S). Exceedingly prolific; extra early; bright shining red; excellent.

SENATOR DUNLAP (S). Large size; medium late.

AROMA (S). The best late.

GLEN MARY (P). Bright, deep red; medium.

Prices, 25 for 35c; 100 for 85c; 200 for \$1.50; 500 for \$3.50; 1,000 for \$6.50. By mail add 10c per 100 for postage.
